EDUCATION

B.Tech in Computer Science, Vignan's Institute Of Engineering For Women Expected Graduation:2028,I have completed my intermediate in Sri Chaitanya with 95%.
Relevant Coursework: Data Structures, Algorithms, Operating Systems

OBJECTIVE

Aspiring software engineer with foundational knowledge in C, Java, and Python. Eager to apply problem-solving skills, grow technical expertise, and contribute to innovative projects through Google's internship program.

ACHIEVEMENTS

Completed Java NPTEL Certification with hands-on coding assignments.

Participated in coding challenges and practice problems on HackerRank/LeetCode/code chef.

TECHNICAL SKILLS

- Languages: C, Java, Python (beginner to intermediate)
- Certification: Java NPTEL Certification
- Tools: Git, VS Code, Eclipse

LEADERSHIP

Campus Recruitment Training (CRT) Coordinator

vignan;s institute of engineering for women

- Coordinated training sessions to prepare peers for campus placements.
- Organized workshops and practice tests to improve problem-solving and interview readiness.
- Collaborated with faculty and students to streamline training schedules.

LEARNING HIGHLIGHTS

Basic Calculator (Java) – Designed a console-based calculator handling arithmetic operations with user input.

String Manipulation (Python) – Wrote scripts to reverse strings, check palindromes, and count character frequency.

Prime Number Checker (Python) – Implemented optimized algorithm to validate prime numbers.

Pascal's Triangle Exploration (Python) – Generated triangle patterns and studied mathematical properties.

Sorting Algorithms (Java/Python) – Implemented bubble sort, insertion sort, and quicksort to understand algorithm efficiency.

SOFT SKILLS

Problem-solving & logical thinking
Debugging & troubleshooting
Team collaboration & communication
